Title

Sculpture à monter soi-même d'une Rolls-Royce miniature

Creation date

20240117

Caption

Picture MUST credit: Rolls-Royce Luxury UK car maker Rolls-Royce has unveiled a miniature sculpture tribute to its heritage - made out of materials used in its hand built vehicles. And it comes with a price tag of £4,386 GBP / €5.315 euros. The self assembly Cameo is described by the marque as "capturing the essence of Rolls-Royce motor cars in their most elegant form."??The silhouette is an homage to the open-top motor cars built by Rolls-Royce in its earliest years. The materials and construction of the model parallel the way motor cars are handcrafted at the company's factory. The model comprises a series of individual, highly engineered pieces carefully and meticulously designed for self-assembly. They are made from a number of the same materials as the marque's full-sized motor cars. Picture supplied by JLPPA
