Caption

June 17th, 2025 - Tel Aviv, Israel. Being a city with majority of old buildings that lack safe spaces many people opt to sleeping in makeshift shelters such as underground parking lots and the underground train tunnels during the missiles attacks from Iran. The missiles from Iran are massive and in contrary to the rockets from Gaza they can completely demolish a building when a direct or near-by hit occurs. This underground train tunnel is situated in the center of Tel Aviv. At this time the train systems are not active and the tunnel was declared as a safe space for the use of the public.
