Title
Animals Of The Brazilian Pantanal
Creation date
20250825
Caption
The Brazilian Pantanal, the largest flooded plain on the planet, recovers after the severe fires that occur in 2023 and 2025. In the image, primates of the black-and-gold howler monkey species (Alouatta caraya) are with their offspring in Corumbá, Mato Grosso do Sul, Brazil, on August 15, 2025.
