### Title

FEATURE - Starenschwärme über England

### Creation date

20181118

### Caption

Image ©Licensed to i-Images Picture Agency. 18/11/2018. Gretna, United Kingdom. Tens of thousands of Starlings dance across the sky at dusk. The phenomenon known as a murmuration happens as the birds fly together in tight twisting formations to protect themselves from predators before roosting in reed beds close by. This site one of the largest in the UK happens near Gretna on the border of England and Scotland. Picture by Stuart Walker / i-Images
