Title
Shuttle Endeavour Docked to ISS
Creation date
20110527
Caption
May 27, 2011: The final flight of space shuttle Endeavour, STS-134, was photographed by the Russian spacecraft Soyuz TMA-20. It is the first time since 1996 that a shuttle has been photographed while docked.///A portion of the International Space Station and the docked space shuttle Endeavour is featured in this image photographed by one of the astronauts, using a fish-eye lens attached to an electronic still camera, during the STS-134 mission's fourth session of extravehicular activity (EVA)..
