Title

Coal-Fired Power Plant In Construction - Siberia

Creation date

20211123

Caption

The construction of a cooling tower at the Tom-Usinskaya state district power plant in the town of Myski in Kemerovo Region, southwestern Siberia. Part of the Siberian Generating Company, the Tom-Usinskaya power plant is the largest in installed electric power in Kemerovo Region; it uses coal from the Kuznetsk Coal Basin as the main type of fuel.
