Title
Scale Insects - Hemiptera - Animal India
Creation date
20250615
Caption
Scale Insects Are Small Herbivorous Insects In The Order Hemiptera That Feed On Plant Sap By Piercing Tissues. These Insects Often Have A Mutualistic Relationship With Ants, Which Consume The Honeydew And Protect Them From Predators. Here Is A Scale Insect Falling Into The Water And Swimming At Tehatta, West Bengal, India On June 15, 2025. (Photo by Soumyabrata Roy/ NurPhoto)
