<p>Squirrels enjoy the vibrant floral colours of summer by playing with and smelling lots of different plants. The small rodents appear to particularly enjoy the dandelions, blowing the delicate seeds everywhere and even trying to eat them.</p> <p>The striking red of their fur stands out against the pinks, purples and yellows of the summertime scene. These adorable images were taken in Bispgarden, Sweden, by photographer Geert Weggen who uses nuts and seeds to entice squirrels to the scenes in his garden. SEE OUR COPY FOR DETAILS.
