Dain pretends to be kissing herself using makeup
Makeup optical illusions, South Korea - Jun 2016
FULL WORDS: <http://www.rexfeatures.com/nanolink/sgqp>

A South Korean student has used makeup to gain chameleonic superpowers.

Dain Yoon is a 22-year-old visual illusion artist currently studying in Korea National University. The daughter of a professor and a painter, she has absorbed herself in drawing from an early age.

Her makeup optical illusions might let her superficially disappear into the backdrop, but there's also a deeper meaning to her works.
