Title

NEWS - USA: Waldbrände in Kalifornien

Creation date

20171206

Caption

December 6, 2017 - International Space Station, Earth Orbit - Smoke from massive fires burning across Southern California seen from the International Space Station December 6, 2017 in Earth Orbit. The Thomas fire fueled by gale force Santa Ana winds carved a path of destruction from the Pacific Ocean to 10-miles inland south along the coast forcing mandatory evacuations for tens of thousands of residents (FOTO: DUKAS/ZUMA)
