Title

FEATURE - Ausdrucksstarke Mimik: Schnee-Eule in Missouri

Creation date

20171220

Caption

December 20, 2017 - West Alton, Missouri, United States: An immature female Snowy Owl flies over the water of the Mississippi River near the Lincoln Shields Recreation area on Wednesday, Dec. 20, 2017, in West Alton, Missouri, 30 miles north of St. Louis. The bird became more active after the sun went down. The snowy owl is a large, white owl of the typical owl family. Snowy owls are native to Arctic regions in North America and Eurasia. Males are almost all white, while females have more flecks of black plumage. Juvenile snowy owls have black feathers until they turn white. The snowy owl is a ground nester that primarily hunts rodents and waterfowl and opportunistically eats carrion. (J.B.
