Title

NEWS - Abholzung und Wildtierwelt auf Borneo

Creation date

20190820

Caption

Endemic flora of Borneo island is detailed in Danum Valley Conservation Area, on August 5, 2019 near Lahad Datu city, State of Sabah, North of Borneo Island, Malaysia. Palm oil plantations are cutting down primary and secondary forests vital as habitat for wildlife including the critically endangered Bornean and Sumatran orangutans.
