Title

Nomige DNA skincare kit

Creation date

20200323

Caption

Victoria Woodhall tries out the Nomige DNA skincare kit, taking a swab of cells from the inside of the cheek which is sent to a lab which analyses your DNA and they sent bespoke anti ageing day and night creams.

The kit costs from £770, which includes the DNA kit and six bespoke products.

DNA kits creates skincare based on your genetic make-up. Developed by Belgian bioengineer Dr Barbara Geusens, Nomige uses your DNA, stored securely, to uncover your skin's unique ageing process before creating serums and creams to target your very specific needs.
